

LITTLE BEAR RIVER DISTRIBUTION SYSTEM

** 1971 ASSESSMENT **

\$ 1,100.00

FORWARD:

The 1971 Water Assessment is to be again based on the Commissioner's Annual Report of water delivered during the year of 1970. The Commissioner reports that 48,466.87 acre-feet of water was delivered during 1970.

CALCULATION OF 1971 ASSESSMENT:

The first step is to determine the minimum \$ 5.00 users and maximum (or less) of acre-feet delivery for such users.

\$ 1,100.00 divided by 48,466.87 acre-feet of water equals \$ 0.0226959157 and \$ 5.00 divided by \$ 0.0226959157 equals 220.30 acre-feet of water (or less) as the minimum amount of water assessed for a minimum assessment of \$ 5.00.

There are 22 such users whose total delivery of water is 1,920.09 acre-feet of water which subtracted from 48,466.87 leaves 46,546.78 acre-feet of water to be assessed against the remainder of the users, and the amount of \$ 990.00, as follows:

	\$ 1,100.00	equals	48,466.87
less	<u>110.00</u>	equals	<u>1,920.09</u>
Thus	\$ 990.00	equals	46,546.78

\$ 990.00 divided by 46,546.78 acre-feet of water equals \$ 0.0212689256, cost of one pro-rated acre-foot of water when multiplied times the amount listed for each user is his or her 1971 Water Assessment.

PROOF:

46,546.78 ac/ft	times	\$ 0.0212689256	equals	\$ 990.00
22 times		5.00 minimum	equals	<u>\$ 110.00</u>

TOTAL 1971 ASSESSMENT \$1100.00
